## SUMMARY

Software engineering professional with hands-on experience building automated tests and benchmarks that evaluate AI coding agents, backed by a background in web development and data systems. Skilled in Python, JavaScript/TypeScript, and CI/CD workflows, with a track record of improving reliability, development workflows, and technical processes.

## PROFESSIONAL EXPERIENCE

May 2026 - Present **AI Software Engineering Evaluator - Handshake AI (Contract, Remote)**

- Designed and delivered 20+ benchmark evaluation projects spanning algorithms, data processing, and systems programming, adopted into Handshake's AI scoring pipeline.
- Built automated test suites and adversarial edge cases that catch failure modes in AI-generated code before they reach final benchmarks, directly improving the reliability of reported agent performance scores.
- Debugged and validated AI-generated implementations against technical specs, tightening evaluation harnesses across Python, JavaScript/TypeScript, and CI/CD to boost reproducibility and cut false-positive passes.

Mar. 2025 - Aug. 2026 **New York Edge - Coding Instructor**

- Taught programming logic, debugging, conditionals, loops, and application behavior through JavaScript-based projects.
- Created lesson materials and progress-tracking resources that helped students build stronger debugging skills.

Oct. 2024 - Jun. 2025 **Jamaica Hospital - IT Specialist**

- Resolved 15-25 daily Tier 1-2 tickets in a fast-paced hospital environment, restoring systems quickly to minimize disruption to nurses, doctors, and patient care.
- Investigated recurring issues using ticket notes, reports, and documentation to identify root causes and prevent repeats.
- Documented ticket trends and resolution steps to improve knowledge sharing and troubleshooting speed.

Jun. 2024 - Oct. 2024 **Department of Youth & Community Development (DYCD) - Program Supervisor**

- Conducted program audits and analyzed site performance data to support compliance and corrective action.
- Cleaned, organized, and analyzed audit results, participant records, and site documentation in Excel to improve reporting accuracy.
- Automated audit tracking workflows by standardizing spreadsheets and templates, cutting turnaround time and reducing errors.

Jul. 2023 - Sep. 2023 **Crunchbase - Junior Web Development Intern**

- Built responsive UI improvements using HTML, CSS, and JavaScript while supporting debugging, QA testing, and Agile workflows.
- Collaborated with developers to review requirements, test updates, document bugs, and validate fixes before deployment.

Jul. 2021 - Sep. 2021 **Changing the Present - Data Analysis Intern**

- Cleaned, validated, and organized donor, campaign, and nonprofit datasets in Excel to improve accuracy.
- Automated repetitive data entry tasks using formulas, lookup functions, and structured spreadsheets to reduce manual errors.

## PROJECTS

**Eureka - AI-Powered Reading & Study Platform (Lead Engineer)**

- Built the PDF upload, rendering, and reading interface using Python, JavaScript, and HTML, now live in production.
- Implemented AI-driven features including on-demand quiz generation and word definitions to improve study workflows.
- Served as lead engineer across the stack, shaping the product's technical direction from build to live use.

**WAVE Business Website Development Project**

- Developed 5+ live responsive websites for small businesses using HTML, CSS, and JavaScript, focused on usability, branding, and mobile-friendly design.
- Gathered client requirements and translated business goals into functional layouts, earning positive feedback that helped businesses attract more customers.

**IT & Cybersecurity Home Lab**

*Windows Server, Active Directory, Linux, VMware/VirtualBox, OPNsense, Wireshark*

- Built and maintained a virtualized enterprise-style lab with Windows Server, Windows 10/11, and Linux for hands-on system administration and security practice.
- Configured Active Directory, user and group accounts, Group Policy, DNS, DHCP, shared resources, and access controls to simulate enterprise IT workflows.
- Deployed and configured firewall, network segmentation, and monitoring tools using OPNsense and Wireshark to analyze traffic and troubleshoot connectivity issues.
- Performed hands-on troubleshooting, vulnerability testing, hardening, patching, and log analysis to practice incident response.

## EDUCATION

New York City College of Technology - B.S. in Computer Science, 2019 - 2023
Per Scholas - Cybersecurity Program, 2025
Certification: CompTIA CySA+

## TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, SQL, HTML/CSS
Frameworks: React, Next.js, Node.js, Express, Flask, Django, FastAPI, Spring Boot
Developer Tools: Git, GitHub Actions, Docker, CI/CD, Linux/WSL
Databases: SQL Server, relational databases
Testing: Automated testing, benchmark development, debugging, adversarial testing
